

*You are a general practitioner and you wish to **start placing implants** ?*

*You are looking for a really strong but condensed (10-months) **education program** in implantology?*

*You would like to feel **more confident** in your implant practice by acquiring strong scientific and clinical basis?*

*You are looking for **experienced mentors** to provide you with truly valuable tips and tricks in implantology?*

General organization:

- This program will be a combination of intense **e-learning** with **on-site, face-to-face sessions** + **surgical** attendance and training.
- **E-learning:** Links towards Rompen's lecture, online conferences, e-books, scientific papers... will be provided to the participants 3-4 weeks before each on-site session, dedicated to 5 major topics.
- **On-site, face-to-face sessions:**
 - Quizz for controlling the acquis of personal e-learning (30-45 min).
 - In depth discussion of the theoretical data (60-120 min).
 - Clinical cases related to the topic.
 - Workshops (when applicable).
- **Clinical training:** Attendees will be eligible to:
 - Unlimited access to DentalMe clinics' (Embourg & Louvain-la Neuve) consultations & surgical rooms for the duration of the program.
 - Supervised (with mentor) implant(s) placement on 2 patients (with surgical guide / X-Guide).
